

Message from the Pleiadian beings for the new year 2024

Dear messengers of light,

It is a great honor for us to accompany you thanks to Pavlína.

We feel it is both an honor and a duty to share with you important information that you need to know.

This information will help you to understand certain situations that you are experiencing.

It will help you to understand the energetic conditions in which you find yourselves as humanity.

In the autumn weeks of this year, after thousands of years of manipulation, your planet has managed to free itself from the timelines that were intended to throw planet Earth back into another period of enslavement and bondage.

The cosmic conditions, the expanded consciousness, and the intensity of light of a vast number of human individuals have contributed to this process of liberation.

An increased amount of extraterrestrial peace-loving civilizations have helped and are still helping in this process.

Planet Earth has liberated itself and stepped onto the path to positive energy and a positive future.

There has been a real shift in time, which you are certainly feeling in your soul, mind, and body.

Cracks are appearing in the element of time. Space is beginning to multiply.

New dimensional spaces are being created for your future.

Your bodies, just like your planet Earth, can absorb the light frequencies of the surrounding planets after thousands of years of manipulation.

Just a few weeks ago, planet Earth was in a so-called energetic quarantine.

The cosmic frequencies did not have full access to it.

After an infinitely long time, your chakras are now experiencing an absolute connection to the energy of the surrounding planets.

Please do not be surprised if your chakras intensify and accelerate the release of issues that they have been carrying for a great number of your past lives. Don't be surprised if your numerous life issues or the cleansing of your life issues sometimes come to a head. But your chakras - gateways to the cosmos - want to revive and reconnect to the energy of your galaxy after a long absence of full cosmic frequencies.

The surrounding planets of your solar system are also experiencing a return to their original order and light matrix. It is not only your planet Earth that has been manipulated by the dark forces.

Some of your solar system's neighboring planets have also been manipulated.

A colossal cleansing and a colossal correction, supported by peace-loving extraterrestrial civilizations with the help of cosmic forces and cosmic laws, is currently in full swing.

A countless number of light beings and light frequencies are also bringing your planet and your surrounding planetary world into divine order.

Thanks to the exit of planet Earth from the artificially created matrix, the Cosmic Council has allowed the extraterrestrial civilizations and the light-filled, highly evolved beings to install and activate the light-filled Sacred Geometry on planet Earth during these weeks.

The Sacred Geometry or Signature, which consists of luminous circles, is the fundamental and sustaining signature that is found throughout the universe.

It is the consciousness database that is connected to everything and carries all the information of the divine, central intelligence.

All information is transmitted via these circles. All cosmic knowledge is encoded in them. Thanks to the installation and activation of this luminous signature, which you can imagine as the signature of the flower of life - consisting of an infinite number of circles - you will very soon feel a connection with your solar system, a connection with your galaxy and a connection with the infinity of the cosmos. You will feel a connection with knowledge, a connection with the light and love of the center source. You will feel a connection with yourself.

The optimal connection to this luminous signature comes through your heart. Through the sacred space of your heart. You will feel the connection with everything essential through your pure heart. The installation and activation of Sacred Geometry on the planet is already underway and will be completed by the spring months of 2024 at the latest.

We would therefore like to draw your attention to the fact that everyone should, if possible, carry out an official farewell to everything negative and to all programmes that hinder your connection to the cosmos by the end of the year.

Through this official farewell or through this ritual, you can energetically close this human year and bless it and enter the new year 2024 with the new connection to the energy of light.

After the installation and activation of sacred geometry, the earth will be energetically connected to the divine, cosmic order.

This means that humans and the systems of the human community will also connect to the divine order at an accelerated rate.

It will be even more clearly recognizable who has connected to the positive laws of the cosmos, to the order and structure of sacred geometry via the pure heart.

The year 2024 will bring even more insights, even more structure, and more clarity.

In relationships, in life, in life situations. It will bring clarity to the system of the body and the system of the chakras.

The installation and activation of Sacred Geometry on planet Earth will bring you an increased connection with nature and of course an increased connection with the oceans and a holistic connection with the element of water. Thanks to this, your DNA will heal and regenerate even faster than before.

Your bodies will be given the opportunity to rejuvenate and gain stronger health.

It is necessary to cleanse and release your own negative issues. It is necessary to feel and act with the heart. It is necessary to return to what the human being is - a pure, loving, and joyful being.

You are returning to your order. You are returning to your origin. Your path forward and the path to higher dimensions of consciousness is unstoppable.

Become members of the cosmic families and their worlds where positive order, clear structure and loving awareness of their most natural essences prevail.

We accompany you step by step. We accompany you and rejoice in each of your successes.

We wish you a happy and joyful 2024. We bless your path, we bless your human lives, we bless your planet.

Peace with you, peace with us.

Your Pleiadian companions
